Welcome to the AFCEA Belgium Site

The Belgium Chapter was established on 12 November 1968, covering Belgium and Luxembourg.

The Chapter has around 70 individual members. Membership includes individuals from government, public services, academia, armed forces and industry with vast experience and working activity in large scale international organizations in Belgium such as NATO HQ, NATO Agencies, Eurocontrol, SHAPE, etc.

The Chapter organizes regular Luncheons plus some visits to organizations or companies in the members’ area of interest. At each event, at least, a prominent guest speaker addresses a subject of interest to professionals in the fields of communications, electronics, information systems technology, security, intelligence and innovation. These luncheons also represent an excellent opportunity to exchange information with other AFCEA members.

In the last years the focus was on Cyber Defence, the enlargement of the NATO, the relocation and reorganization of NATO HQ, changes and future plans of NCI Agency, innovation and future trends.
Meet our International team
